Fueling India's Future with Solar

Upvoltage is a new-age solar company on a mission to deliver clean, reliable, and high-performance energy solutions. Since starting in 2018, we've grown from a bold idea to a trusted name-successfully **completing over 80+ MW of solar projects across India.**

Our goal is simple yet powerful: to make solar energy accessible to all by building strong, lasting solar systems-and reaching **250 MW of installed capacity by 2027.**

OUR VISION

To transform the way India powers its future by making clean, sustainable solar energy accessible, affordable, and reliable for all - from individual households to large-scale industries. We envision a greener tomorrow where every rooftop, every community, and every enterprise contributes to a self-reliant, energy-efficient nation.

OUR MISSION

- Achieve 250 MW installed capacity by 2027
- Democratize power generation
- Build lasting, high-performing solar assets
- Deliver unmatched returns to customers

Partners & Co⚡laborations
